KASHIF UR REHMAN

Full Stack Developer

+92 302 9119254 | kashifkhankk799872@gmail.com | Peshawar, Pakistan | LinkedIn Profile

PROFESSIONAL SUMMARY

Full Stack Developer with 2.5+ years of professional experience building scalable, secure, and production-ready web applications across **React, Node.js, Express.js, and NestJS**. Skilled in designing both **microservices and monolithic architectures**, relational and NoSQL database design (**MongoDB, MySQL**), and cloud infrastructure (**AWS, Azure, Google Cloud**). Hands-on experience integrating payment gateways (**Stripe, TESS Payment, CyberSource**), AI-powered backend features, and third-party APIs. Delivered 10+ production projects spanning AI automation platforms, multi-role enterprise systems, and blockchain-enabled applications, with a strong focus on code quality, application security, and performance. Experienced with version control and CI/CD workflows across **GitHub and Azure DevOps (ADO)**, and proactive in resolving vulnerabilities flagged by **SonarQube and Mend Bolt** to maintain secure, maintainable codebases.

TECHNICAL SKILLS

Frontend: React, JavaScript, TypeScript, HTML5, CSS3

Backend: Node.js, Express.js, NestJS, RESTful API Design

Databases: MongoDB (Mongoose), MySQL (Sequelize) — Schema Design, Query Optimization, Indexing

Architecture: Microservices, Monolithic Architecture, API Design Patterns

Cloud & Storage: AWS (S3, SES), Azure Blob Storage, Google Cloud Storage

Payments: Stripe, TESS Payment, CyberSource — Subscriptions, Transactions, Webhook Handling

Security: JWT Authentication, Authorization, RBAC, Password Hashing, API Security Best Practices

Code Quality & DevOps: Git, GitHub, Azure DevOps (ADO), SonarQube, Mend Bolt (Vulnerability Remediation), CI/CD

Other: AI Backend Integration, Email Services (SES/SMTP), Third-Party API Integration, Clean Code Practices, Performance Optimization, API Documentation

PROFESSIONAL EXPERIENCE

Backend Developer *October 2024 – Present*

Veroke Pvt Ltd

- Design and develop scalable backend systems using Node.js, Express.js, and NestJS for production applications
- Architect complete backend solutions across microservices and monolithic architectures, ensuring high performance, reliability, and security
- Optimize RESTful APIs and database schemas using MongoDB and MySQL for scalability and efficiency
- Implement secure authentication, authorization, and role-based access control (RBAC)
- Integrate payment gateways including Stripe, TESS Payment, and CyberSource
- Work with cloud and storage services such as AWS S3, Azure Blob Storage, and Google Cloud Storage, as well as email delivery services (AWS SES)
- Develop AI-related backend features, including API integrations and data processing for AI services
- Manage source control and CI/CD workflows using GitHub and Azure DevOps (ADO)
- Identify and remediate code quality and security vulnerabilities flagged by SonarQube and Mend Bolt
- Collaborate with cross-functional teams to deliver maintainable, production-ready solutions

KEY PROJECTS

ViralFlicks — AI-Based Short Video Generation & Auto-Posting Platform

- Designed and developed the complete backend system using Node.js with AI integrations
- Implemented automated short-video generation workflows and auto-posting to TikTok, YouTube, and email platforms
- Integrated Stripe subscription billing, including webhook handling for renewals and payment lifecycle management
- Built an Admin Panel using AdminJS for monitoring, analytics, and platform management
- Designed scalable MongoDB schemas to support high-volume content generation and user activity

Q Mobility — Rent-A-Car Platform (Qatar-Based Client)

- Developed end-to-end backend architecture using Node.js and Express.js
- Implemented multi-role system (Admin, Fleet Manager, Driver, Customer)
- Built a complete vehicle booking and driver assignment system with availability management
- Integrated dual payment gateways (TESS Payment & CyberSource) for the Qatar market
- Designed optimized database structures for vehicles, drivers, customers, bookings, and fleet operations

Barzah — Property Investment & Purchase Platform (Qatar-Based Client)

- Built the complete backend system using NestJS, MySQL, and Sequelize ORM
- Implemented blockchain integration for secure property transaction verification
- Developed property investment and purchase workflows with secure authentication and RBAC
- Designed RESTful APIs with strong validation, error handling, and performance optimization
- Followed enterprise-level architecture patterns for scalability and maintainability

Wareed Labs — Medical Lab Management System (3 Months)

- Developed a complete promo code management system, including generation, validation, and email distribution
- Implemented notification systems for appointments, lab results, and user communications
- Built RESTful APIs using Node.js and Express.js
- Optimized database queries and ensured clean, maintainable backend code

EDUCATION

Bachelor of Software Engineering

Islamia College and University, Peshawar, Pakistan 2020 – 2024 | CGPA: 3.40
